EXPERIENCE

Fullstack Developer

PointPlus Food Delivery/September 2022

- Developed and maintained a modern multi-vendor marketplace platform serving customers, vendors, delivery riders, and administrators.
- Built responsive, reusable, and accessible user interfaces using React, Next.js, JavaScript, and Tailwind CSS.
- Implemented role-based dashboards with features including order management, inventory tracking, vendor management, rider operations, analytics, and reporting.
- Integrated RESTful APIs and collaborated with backend engineers to deliver seamless end-to-end functionality.
- Improved application performance, resolved bugs, and optimized user experience across multiple devices.
- Implemented authentication, authorization, and secure user workflows.
- Participated in code reviews, feature planning, testing, and deployment to ensure high-quality software delivery.
- Collaborated with designers, product managers, and developers in an agile development environment.

Fullstack Developer

Carelyo / July 2024

- Developed and improved the Care Platform website, including key features like the Providers page and Admin Dashboard, using Next.js and Bun.js to enhance performance, security, and SEO, resulting in better rankings and user retention.
- Collaborated closely with a partner to architect and develop a cross-platform React Native application, facilitating real-time communication between users and healthcare providers via secure video calls and instant messaging. These integrated features significantly boosted user engagement and accessibility.
- Designed an intuitive admin interface that empowered healthcare providers to efficiently manage their profiles, appointments, and patient interactions. This streamlined solution not only optimized day-to-day provider operations but also led to a marked improvement in user satisfaction across the platform.
- Optimized the development pipeline by implementing modern tools and agile methodologies, significantly reducing deployment time and improving overall efficiency. This contributed to a more scalable, user-centric platform that consistently delivered high-quality results.

EDUCATION

Bachelor of Computer Science

National institute of information technology (NIIT) / 2021

Fullstack Development Specialization

Self-Directed Learning & Projects

TECHNICAL SKILLS

- Programming Languages - TypeScript, Python, Java
- Backend Development - Node.js, Bun, Hono, Appwrite
- Frontend Development - HTML, CSS, React.js, Next.js, Shadcn, TailwindCSS
- Mobile Development - React Native, Expo
- Database & ORMs - MySQL, SQL, MongoDB, Prisma
- DevTools & Build Systems - Git, GitHub, Docker, NPM, Webpack, Babel
